DETAILED ACTION

1. Lack of Unity

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 3, and 5, drawn to a dopaminergic neuron proliferative progenitor cell probe and a method of selecting cells.

Group II, claim(s) 6 and 9, drawn to a dopaminergic neuron proliferative progenitor cell.

Group III, claim 7, drawn to a method of isolating a gene.

Group IV, claim 8, drawn to a method of screening using a maturation index.

The invention listed as Groups I-IV do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical feature for the following reasons: the special technical feature of Group I is a probe. The special technical feature of Group II is a cell. The special technical feature of Group III is a method of isolating a gene. The special technical feature of Group IV is a method of screening. The special technical feature of each group is not the same, or does not correspond to the special technical feature of any other Group. The products of Groups I-II are structurally and functionally distinct, and the methods of Group III-IV require different method steps and reagents for achieving different goals. The Groups are not linked by a special technical feature within the meaning of PCT Rule 13.2 so as to form a single inventive concept.

Furthermore, in order to be fully responsive, in addition to electing a Group, Applicants must further elect one independent and distinct SEQ ID NO selected from SEQ ID NO:1, 2, 3 or 4.

Art Unit: 1647
